- Filed for $140 million in February 2026
- A 15.2% increase
- If approved, takes effect January 2027

EPM CTC systems save significant and verifiable energy UNITS. Purchased only once (no maintenance contracts), and lasting as long as the building, the more energy costs, the larger the Return On Investment (ROI) the CTC system produces.

It's never too late to install your CTC system, because routine energy cost increases are not going to stop.
